# WASHUNITS WITH OZONE

The ozone generator ozones the mains water used to wash hair in hair salons. Ozone is a gas with a high oxidizing power capable of sanitizing skin and hair. This gas is completely ecological as, after carrying out its oxidizing function, it returns oxygen without leaving harmful residues.

In addition to combating hair loss, ozone leaves hair softer and revives its color and shine.

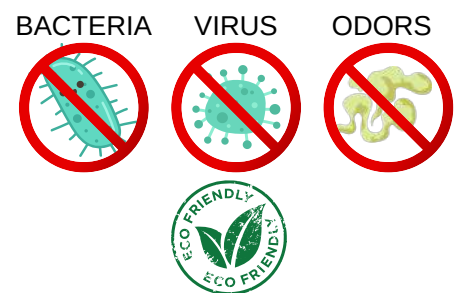

The use of ozonated water also allows you to reduce the amount of use of shampoo and conditioner. It also reduces seborrhea and improves the condition of hair damaged by dyes, straighteners and bleaches.

The use of ozone is the simplest, most effective and ecological sanitization tool.

has been recognized by the Ministry of Health as a "Natural Presidium for the sterilization of environments contaminated by bacteria, viruses, molds, mites etc., in July 1996 Prot.nr.24482

internationally it is recognized by FDS (2001) and USDA (2002) as a safe and effective protection.

dimensions: 20x23x10,5cm

LAUNCH PRICE

**1.325€**

Compatible with all washes, even with existing washes of any brand. Once installed and connected to the pipes inside the wash, it is ready for use and does not require any particular maintenance with the exception of cleaning the filter. It does not require the addition of substances or chemical products to function as it takes air from the surrounding environment and converts it directly into ozone. Once generated, the ozone is mixed with the water inside the dispenser. The use of a washbasin with an ozone dispenser is therefore exactly the same as that of a standard washbasin with the difference that the water that comes out of the shower head is ozonated water with the beneficial characteristics described above.

## FLAMINGO TOTEM

art.0001 handshower and mixer integrated

**1.189 €**

art.0002 handshower and mixer integrated,Shirodara massage system (bowl included),bluetooth speaker

**1.610€**

art.0003 handshower and mixer integrated,Shirodara massage system (bowl included),bluetooth speaker.

OZONE generator

**2.885 €**

possibility of making the column self-supporting with a base to be fixed to the ground

**+595 €**

to be added to the price of the chosen version of the column

**FLAMINGO TOTEM:** it is a multifunctional column designed to be mounted on the side of the washbasin and provide the following services:

- hand shower and mixer integrated in the column in order to completely free up the space inside the sink and therefore have much more free space for the hairdresser's work.
- Integrated ozone generator. The ozonated water that comes out of the shower head makes hair softer and shinier.
- Shirodara massage. The hairdresser can give a relaxing Shirodara massage to the client thanks to the bowl designed for essential oils and the position adjustment system on the client's head.Oils not supplied.
- Music. A Bluetooth speaker allows the diffusion of relaxing music during treatments

### ADAPTABILITY TO EXISTING WASHUNITS

It is possible, after verification, to mount Flamingo Totem on existing washbasins of ours but also of other brands. If the wash in question does not allow the possibility of fixing the column laterally, it is possible to opt for the solution of adding the base to be fixed to the ground which makes the column self-supporting and therefore independent of the wash.

## HANDSHOWER AND MIXER OUT FROM THE BASIN

The hand shower and the mixer are integrated into the column; the extractable shower head comes down from above and the hose has the right length to reach well under the customer's neck.

Once lowered, the hose remains in position to allow the hairdresser to complete the service even with the water turned on. Once the service is finished, the hose retracts easily by accompanying it upwards.

## MORE SPACE INSIDE THE BASIN

Moving the hand shower and mixer in the column allows you to mount a totally empty and free sink inside of.

In this way the hairdresser has much more operating space even in the case of the client's very long hair.

The extra comfort for the hairdresser of the free sink it is the added value of this new system.

## OZONE DISPENSER INTEGRATED

The dispenser is already integrated into the column so no need for special installations, the wash should be connected normally. No particular maintenance.

## SHIRODARA MASSAGE

Shirodara is a thousand-year-old ritual of the Yurveda tradition which consists of a continuous flow of hot oil on the head which relaxes, nourishes the tissues and hydrates the hair, making it soft, shiny and full-bodied.

It gives a feeling of relaxation, tranquility and mental calm thanks to the addition of essential oils with an aromatic function. The constant flow of hot oil creates a light massage on the scalp, improves blood circulation, promotes the phase of relaxation and psychophysical rebalancing.

The column is equipped with a hook to hang the bowl to be filled with essential oils and a system for regulating the position of the bowl on the client's head. Oils not supplied.

## MUSIC

An integrated Bluetooth speaker allows you to connect any multimedia device for playing relaxing music during treatment.
